-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Lagomarsino.

See the foldable flexible device of Figs 1 and 3. The aperture is seen at 8. Full response is rendered to claims 2, 3 and 7. Claims 8-9 are included here in that they set forth no structure not taught by Lagomarsino as they merely recite some intended use parameters of which Lagomarsino is capable of due to its flexibility.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lagomarsino as applied supra, in view of Williams.

To employ a conventional connector such as taught in Fig. 4 of Williams would have constituted an obvious expedient show used in an identical art device.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3751

Claims 5 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The nature of the pressure valve is not set forth in the drawings nor is the description of page 6, last paragraph enabling.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lagomarsino, as applied *supra*, in view of Rhines.

To employ a water source such as taught in Fig. 1 of Rhines would have been obvious to the ordinary artisan as same is shown in an identical art device.

Claims 10-19 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/11/04.

Applicant traverses on the grounds of no serious burden and that no appropriate explanation of the specific reasons for the restriction was given.

Applicant should consult M.P.E.P. 808.01 and 808.01(a). The former rebuts applicants first grounds and the latter in paragraph one, the last three lines rebuts the second grounds.

Applicant should consult these citations in order to understand the election of species practice as opposed to the restriction practice. This requirement is hereby made final.
